Hangga Aji Sayekti

Application Security Engineer · Software Engineer · Technical Writer

Application security engineer focused on API security, web application vulnerabilities, and real-world exploitability in production systems — backed by a decade of software engineering experience.

📍 Greater Yogyakarta, Indonesia | 🔗 hangga.web.id | 💼 Open to Security & Engineering roles

EXPERIENCE

Expert Writer — Computer Science & Mathematics

Sep 2026 – Present

The Research Code · Seasonal

Remote

- Invited expert writer covering computer science, mathematics, and technology.
- Translate complex technical concepts, emerging technologies, and scientific findings into clear, accessible, and practically relevant content.

Software Development | Application Security | Technical Writing

Aug 2024 – Present

Stealth · Freelance

- Curated collection of application security research, vulnerability disclosures, technical writeups, software development insights, and technology articles.
- Manual testing · source code analysis · business logic exploration.

Technical Code Reviewer & Tech Author

Feb 2025 – Jul 2026

CircleCI · Freelance

San Francisco, CA · Remote

- **Technical Code Reviewer** — reviewed and validated technical content, code samples, and repositories to ensure technical accuracy and reproducibility.
- **Tech Author** — authored developer-focused tutorials covering CI/CD automation, application security testing, and JVM performance optimization using real-world examples.

Author — Kali Linux & Security

Sep 2025 – Jan 2026

It's FOSS · Freelance

Remote

- Introduced cybersecurity and penetration testing as a new content category for Linux Handbook.
- Published 10+ technical articles covering Kali Linux, penetration testing, and offensive security — reaching over 1.1K readers within the first few months.
- Produced hands-on tutorials focused on practical techniques, real-world tooling, and reproducible labs.

Head of Product and Engineering

Aug 2023 – Feb 2025

Kredibel · Full-time

Jakarta, Indonesia · Remote

- R&D for new feature ideas based on company and user needs.
- R&D for new tech/library implementation required by the product roadmap.
- Resolved application release problems across Google Play Store and Apple App Store.
- Continued hands-on work as a software engineer.

Senior Software Engineer — Mobile Platform

Sep 2020 – Feb 2025

Kredibel · Full-time

Jakarta, Indonesia · Remote

- Spearheaded development and launch of the company's first native Android and iOS applications, establishing the mobile platform foundation.
- Designed and developed the Android-based Kredibel Vision SDK, enabling identity verification capabilities in partner applications.
- Established the company's first private Maven repository, standardizing SDK distribution, dependency management, and versioning.
- Evaluated and integrated mobile ML technologies (Google ML Kit, Firebase ML Kit, Huawei ML Kit) for computer vision and identity verification.
- Built proof-of-concept applications and technical prototypes to validate new technologies and support client demos.

> **Stack:** Java · Kotlin · Android Studio · RxJava · Retrofit · Firebase · GitLab · ML Kit · Xcode · Swift · SwiftUI · Alamofire · CoreData · Maven Repository · Repsy.io · Azure DevOps · Google Artifact Registry

Author — Java and Kotlin Series

Oct 2023 – Oct 2024

Baeldung · Freelance

Bucharest, Romania · Remote

- Authored practical Java and Kotlin articles helping developers solve real-world programming challenges, from language features and JVM internals to framework-specific issues.
- Developed reproducible sample projects and automated tests to validate solutions and demonstrate production-ready patterns.
- Collaborated with editors and technical reviewers to publish accurate, developer-focused content.

> **Published:** Qualified this and Implicit this in Kotlin · Excluding Transitive Dependencies in Gradle · Configure Kotlin's Bytecode Version with Gradle

Lead Engineer

Aug 2015 – Mar 2020

Sebangsa Network · Full-time

Yogyakarta, Indonesia · Hybrid

- Led the engineering team developing an Android application recognized as one of Google Play's Best Apps of 2015 — overseeing architecture, development, code quality, and production releases.
- Delivered multiple large-scale Android releases while maintaining high stability, performance, and code quality.
- Built and mentored a high-performing Android engineering team by establishing code review standards, development workflows, and release processes.
- Introduced modern Android technologies and practices (RxJava, Dagger, Retrofit, MVP) that improved maintainability and development efficiency.
- Drove technical decisions that enhanced performance, scalability, and user experience across multiple product releases.

Senior Android Developer

2015 – 2017

Sebangsa Network · Full-time

Yogyakarta, Indonesia

- Contributed to Sebangsa, Arena, and "M" projects, and mentored junior engineers.

> **Stack:** Android Studio · Java · RxJava · Retrofit · OkHttp · JSON · Gson · Firebase · Dagger · MVP · GitLab · Subversion

Android Developer

Jan 2013 – Aug 2015

Sebangsa Network · Full-time

Yogyakarta, Indonesia

- Developed the Sebangsa apps from scratch.

> **Stack:** Android Studio · Java · Retrofit · OkHttp · JSON · Gson · GCM · MVP · GitLab · Subversion

Android Development Mentor

Jun 2015 – Dec 2015

Pondok Programmer

Bantul, Indonesia

- Taught classes and built the syllabus, including materials and sample projects.
- Monitored student progress and provided consultation.

> **Stack:** Java · Eclipse IDE · Android SDK · XML · Layouting · Motion Animation · Basic Game Development

Information System / Programmer

Mar 2010 – Dec 2012

Universitas Negeri Yogyakarta

Yogyakarta, Indonesia

- Developed and maintained information systems including student registration, financial monitoring, internet services, and the rector election vote-counting system (SitungRek).
- Built websites for seminars, scientific events, and workshops.
- Assisted IT training mentors for lecturers and staff, and supported IT for campus events.

> **Stack:** Delphi 7 · PHP · CodeIgniter · CSS · HTML · jQuery · MySQL · PostgreSQL · WebService · SOAP

Delphi Programmer

Jun 2008 – Nov 2010

CV. Solusi Netindo

Yogyakarta, Indonesia

- Developed Windows applications including Management Information Systems, Inventory Systems, Airline Ticketing Systems, and Ship Port Information Systems.

> **Stack:** Borland Delphi · Interbase · Firebird · SQL · Microsoft SQL Server

Mathematics Tutor

2003 – 2007

Self-employed

Yogyakarta, Indonesia

- Taught Mathematics privately for Elementary and Junior High School students.

Layout Editor

2003 – 2004

CV Mutiara Tiga Prima · Part-time

Yogyakarta, Indonesia

- Layout editing with CorelDRAW 11, print-to-plate, print mirror, and print to tracing paper.
- Delivered printed scripts to machine operators and supported finishing work.

EDUCATION

Yogyakarta State University

2002 – 2009

S1 / Bachelor — Mathematics

LICENSES & CERTIFICATIONS

Ethical Hacker
Cisco Networking Academy
Issued Nov 2025

Secure AI/ML-Driven Software Development (LFEL1012)
The Linux Foundation
Issued Nov 2025

Understanding the OWASP® Top 10 Security Threats (SKF100)
The Linux Foundation
Issued Nov 2025

Android Bug Bounty Hunting: Hunt Like a Rat
EC-Council
Issued Jul 2025 · ID 6c69658e

Introduction to Penetration Testing
Security Blue Team
Issued Jul 2025 · ID 281113316

SQL Injection Attacks
EC-Council
Issued Jul 2025 · ID f773daad

ISMS Awareness ISO/IEC 27001:2022
PT. Bhinneka Inti Global Data (BIG DATA)
Issued Jun 2023 · ID 003/ISO.AT-ISMS/VI/2023

JavaScript (Intermediate) Certificate
HackerRank
Issued May 2023 · ID fb5eb8a41cc2

SQL (Advanced) Certificate
HackerRank
Issued Jun 2023 · ID 3e3a63e4cea3

Ethical Hacking — Mobile Platforms & Network Architecture
Great Learning
Issued May 2023 · ID FMIJJQZP
